

**Season 10, Week 2, 9/17/2012, 5:02 PM**

Hi all -- This week Noah, along with several other bakery members, is celebrating Rosh Hashanah, the first of the High Holy Days which fill the Jewish calendar around this time of year. Rosh Hashanah is a celebration of the start of the Jewish year.

Because of that, Javiera and I are baking alone today, and making loads of cinnamon rolls. We were joined this morning in the kitchen by Victoria Bouloubasis and Derek Anderson, who are working on a longer story about the bakery for the Independent Weekly.

Come visit us this Saturday morning at the Green Flea Market on East Petigrew Street in Durham!

Come visit us this Saturday morning at the Green Flea Market on East Petigrew Street in Durham!

## **Our fundraising campaign ends on Thursday night, and we still need your help!**

Thanks so much for everyone's support so far. We've raised nearly \$4,500 so far. That's enough to cover two months of baker salaries as we check out new markets, learn about worker co-ops and alternative economies and test recipes.

Can you help us raise \$5,000 more? We need 200 people to contribute \$25 each.

Here's what you can do:  
Think of two people you know who don't know about the bakery yet and who would be able to contribute \$25. Share the indiegogo page with them and talk to them about why you donated! If everyone on this list talks to just two people, we'll meet our goal many times over!

## **The money we're raising is already making a difference. So far, thanks to PayPal donations, we've:**

- \*started paying ourselves hourly (at minimum wage) for the first time in the history of the bakery
- \*developed a new shift schedule so that we can work more efficiently during bake days
- \*tested recipes for cakes and gluten-free breads
- \*planned our first market day (this Saturday 9/22) at the Green Flea Market

this week!

## Thirty years of struggle in Warren County

This weekend, folks gathered in Warren County, NC to celebrate and commemorate the 30th anniversary of the environmental justice struggle in that county. Warren County is about an hour driving time north of Durham along I-85, just south of the Virginia border, and is one of the poorer counties of the state.

In 1978, Raleigh company Ward Trans-former illegally dumped 30,000 gallons of highly-carcinogenic (cancer-causing) PCB waste along 240 miles of NC roadside (across 14 counties). Seeking a fast and relatively cheap solution to the problem, Democratic Governor Jim Hunt's administration chose to build a landfill and dump the toxic soil. The site they chose was right in the middle of one of Warren County's African-American communities,
